

Dx35 Mid Range Distance Sensors

Larger than life performance – flexible measurement
and detection up to 35 m

SICK
Sensor Intelligence.

Dx35 – reliable measurement with no compromises

The versatile Dx35 product family stands out thanks to its compact design and reliable performance. Proprietary HDDM technology ensures stable and accurate measurements at any time. In addition, a remarkably small housing size and a reduced blind zone, makes the Dx35 the number one choice for use in confined spaces with a range of up to 35 m.

Lightning fast response time

The Dx35's response time can be adjusted to keep track of even the fastest production processes.

Ultimate in glare-resistance

Other optical sensors on the market can provide unstable measurements due to ambient light. The Dx35's statistical time-of-flight technology always produces stable measurements.

Ignores background reflections

Get rock solid target detection and measurement with SICK's time-of-flight technology, which ignores even the most shiny background materials.

No cross talk

The Dx35's coded transmission pulses allow several sensors to be used simultaneously in confined spaces.

Precise no matter the color

HDDM technology guarantees precise time-of-flight measurement across the entire color spectrum.

Solves most difficult applications

The Dx35 detects and measures both extremely dark and shiny objects, as well as objects tilted at extreme angles – an impossible task with other sensors in the market.

Multiple set-up options ...

Direct teach-in function on the sensor

Cut down on your commissioning costs with the quick and easy teach-in function on the control panel.

External teach wire

External teach-in allows simple and fast remote set-up if no access is available during the running process.

Communication via IO-Link

With IO-Link a switching output turns into a communication interface. This enables quick batch change-over and simple commissioning, maintenance and diagnostics.

Simple solution for complex applications

The Dx35 provides three different switching modes to meet the requirements of any application including complex ones. These are: "Distance to Object" "Window" and "Object Between Sensor and Background" (OBSB, see illustration).

... and flexible in any application

Reliable monitoring of storage space occupancy or fill level in distribution and warehousing systems

Inspection

Ensures high quality vehicle manufacturing and error-proofing by reliably detecting small parts from a safe distance.

Positioning

Precise and automatic positioning of shuttles, forklifts and the load which can be of any color and structure.

Stacking

Optimized and faster production processes due to reliable monitoring of filling and stacking levels.

Larger than life performance – flexible measurement and detection up to 35 m

Product description

The Dx35 family of distance sensors, based on HDDM™ technology, combine maximum reliability, measuring capabilities, flexibility and the perfect price-performance ratio in a very compact housing.

Depending on the application, sub-product families are available for distance measurement on natural objects (DT35 and DS35) or on reflective tape (DL35 and DR35).

The sub-product families also come with different interfaces. In addition to the IO-Link function, which all the devices have, the product family also offers sensors with analog and switching output (DT and DL) or the option of two switching outputs (DS and DR).

Its final distinguishing feature when selecting the right sensor for the application is the light sender: infrared or red light in laser class 1 or 2.

At a glance

- Maximum reliability, immunity to ambient light, and best price/performance ratio thanks to HDDM™ technology
- Measuring range of 0.05 m to 12 m for natural objects or 0.2 m to 35 m on reflective tape
- Devices with analog and switching output, or just switching
- Infrared or red laser in class 1 or class 2
- Repeatability: 0.5 mm to 5 mm
- Small housing size
- IO-Link

Your benefits

- Precise and reliable measurement regardless of object color extends run time and process quality
- A small size and blind zone make flexible mounting possible when space is limited
- Optimum solution thanks to flexible settings for speed, range and repeatability
- Flexible interface use: 4 mA to 20 mA, 0 V to 10 V, PNP output, NPN output, or IO-Link – making machine integration simple
- Offering easy alignment, optimal performance or inconspicuous measurement, versatile light senders make it an ideal solution for all scenarios
- Low investment costs and high performance levels guarantee a quick return on investment
- IO-Link offers full process control, from commissioning to service
- A wide variety of control options ensures rapid commissioning and fast batch changes

Simple integration into your automation world

Our intelligent sensor solutions and safety controllers make available different integration technologies that allow easy access – from HMI, PLC, and engineering tools – to data from our sensors. In this way, we support you towards solving your application rapidly and easily and increase machine availability with a continuous diagnostic concept.

Industrial communication

SICK's fieldbus and network solutions allow sensors and safety controllers from SICK to be connected to all common automation systems. This guarantees simple and fast access to all available data and information.

PLC and engineering tool integration

Whether the issue is generic integration using device description files, standardized interfaces (e.g. TCI, FDT/DTM) for diagnosis or integration into the PLC program via function blocks – the user-friendly tools from SICK support you in implementation.

HMI integration

SICK offers a wide range of means to integrate process, status, and diagnostic data from SICK sensors into a visualization system. Tools such as OPC servers, web servers, or SCL allow simple and fast integration into your individual HMI solution – independent of the technology used.

Software and tools

Our software tools support you in establishing connections, parameterizing and diagnosing sensors and safety controllers from SICK. The intuitive user interface permits simple and fast designing and realization of the application required.

Request or view a quote: You can have a quote generated online here. Every quote is confirmed to you via e-mail.

Order online: You can go through the ordering process in just a few steps.

For safety and productivity: SICK LifeTime Services

SICK LifeTime Services is a comprehensive set of high-quality services provided to support the entire life cycle of products and applications from system design all the way to upgrades. These services increase the safety of people, boost the productivity of machines and serve as the basis for our customers' sustainable business success.

Consulting & Design

Globally available experts for cost-effective solutions

Product & System Support

Fast and reliable, by telephone or on location

Verification & Optimization

Checks and recommendations for increased availability

Upgrade & Retrofits

Uncovers new potential for machines and systems

Training & Education

Employee qualification for increased competitiveness

SICK at a glance

Leading technologies

With a staff of more than 5,800 and nearly 50 subsidiaries and representations worldwide, SICK is one of the leading and most successful manufacturers of sensor technology. The power of innovation and solution competency have made SICK the global market leader. No matter what the project and industry may be, talking with an expert from SICK will provide you with an ideal basis for your plans – there is no need to settle for anything less than the best.

Unique product range

- Non-contact detecting, counting, classifying, positioning and measuring of any type of object or media
- Accident and operator protection with sensors, safety software and services
- Automatic identification with bar code and RFID readers
- Laser measurement technology for detecting the volume, position and contour of people and objects
- Complete system solutions for analysis and flow measurement of gases and liquids

Comprehensive services

- SICK LifeTime Services – for safety and productivity
- Application centers in Europe, Asia and North America for the development of system solutions under real-world conditions
- E-Business Partner Portal www.mysick.com – price and availability of products, requests for quotation and online orders
